

Objective:

Results-oriented Software Developer with 1 year of experience in **full-stack development**, specializing in **C#, .NET, Angular, SQL, and database management**. Skilled in **web development, object-oriented programming (OOP), RESTful APIs, and data visualization**. Passionate about delivering high-quality solutions and eager to contribute to a **dynamic, innovative environment** that fosters learning and continuous improvement.

Professional Experience:

Freelance Full-Stack Developer (*Self-Employed / Remote*)

September 2025 – Present

- Worked as an independent Full-Stack Developer, delivering end-to-end software solutions for clients.
- Developed FlexiERP, an MSME-focused business management system with modules such as inventory, billing, customer/vendor management, and reporting.
- Built a Point of Sale (POS) System for retail businesses to manage sales, stock, invoices, and daily transactions efficiently.
- Completed multiple small-to-medium projects, including:
 - Responsive websites
 - Web application features
 - Backend APIs and database integration
- Technologies used: .NET / ASP.NET Core, Angular, SQL Server, REST APIs, HTML, CSS, JavaScript, NestJs
- Handled requirement analysis, development, testing, deployment, and client communication independently.
- Earned ₹70,000+ through freelance projects, maintaining timely delivery and client satisfaction.

Software Developer @JPR SYSTEM PVT.LTD.

Feb 2025 – 15 SEPT 2025

As a Software Developer at JPR SYSTEM PVT. LTD., I work as a **Full Stack Developer**, contributing to the design, development, and maintenance of scalable web applications.

Key Responsibilities:

- Architect, develop, and maintain enterprise-grade full-stack applications using C# (.NET 8/6), ASP.NET Core, and Angular, following SOLID principles and design patterns.
- Design and implement RESTful APIs with JWT authentication, role-based authorization, and secure data transfer between client and server.
- Perform database design, optimization, and query tuning using MSSQL Server, including stored procedures, views, triggers, and EF Core migrations with SQL Client.
- Implement Entity Framework Core for ORM-based data access, handling LINQ queries, DbContext, and repository patterns.
- Develop responsive, mobile-first UI/UX using Angular components, TypeScript, Bootstrap, Tailwind CSS, and RxJS for reactive programming.
- Generate dynamic PDF reports using DinkToPdf and automate Excel operations with ClosedXML for data export/import.
- Integrate third-party REST/SOAP APIs and manage HTTP client services, async/await patterns, and error handling/logging.
- Collaborate in Agile/Scrum teams, conduct code reviews, implement unit testing (xUnit, NUnit), and ensure high-quality, maintainable code.
- Utilize Git/GitHub for version control, perform CI/CD deployments via Azure DevOps, and maintain comprehensive technical documentation.
- Conduct performance profiling, debugging, and optimization for backend services, front-end responsiveness, and database queries.
- Ensure adherence to software engineering best practices, SOLID principles, DRY/KISS concepts, and scalable architecture design.

Data Science Intern @Celebal Technologies, Jaipur

May 2024 – July 2024

- Gained experience in Python, SQL, and Python Libraries
- Improved data science skills and knowledge through training and collaboration.
- Gained experience in Data Visualization, data analysis, and data manipulation.

Salesforce Trainee @AU Ignite Future Skill Academy, Jaipur

Apr 2024 – Jul 2024

- Completed Salesforce training, enhancing expertise in CRM solutions.
- Solved 100+ Java questions, demonstrating strong problem-solving skills.
- Acquired in-depth knowledge of Java OOP concepts.
- Strengthened logical reasoning abilities through practical exercises.

Projects:

FlexiERP – All-in-One Business Suite (FOR CLIENT)

Tech Stack: .NET 8, ASP.NET Core, Angular, MSSQL, Azure, Tailwind CSS, Bootstrap, ADO.NET, EF Core

Highlights:

- Role-based access (Admin, Manager, Employee) with JWT authentication
- Inventory & Billing with real-time tracking and GST invoicing
- Data Backup using SQLite and auto report generation (Excel/PDF)
- Responsive UI built with Angular, Tailwind, and Bootstrap
- Optimized SQL procedures for warehouse and category modules
- CI/CD via Azure DevOps with secure API design and password hashing

AgriMandi – Farmers Market .NET, Angular, MSSQL) - ([visit](#))

- Developed a full-stack web application enabling farmers to sell their produce directly to buyers, eliminating middlemen.
- Implemented the backend using .NET (C#) with Entity Framework and built a responsive frontend using Angular.
- Integrated Microsoft SQL Server for efficient data storage and management.
- Ensured robust API functionality and seamless frontend-backend interaction using Postman and Swagger for testing and documentation.
- Successfully deployed the application on Microsoft Azure for public access and scalability.

Skills:

- **Programming Languages:** .NET, Java, Python, SQL, JavaScript, HTML, CSS
- **Web Development:** Angular, Typescript, Entity Framework, Spring Boot
- **Database Management:** MSSQL, MySQL, RDBMS
- **Tools:** Git, Power Bi, Figma
- **Data Analysis & Visualization:** Python (Pandas, Matplotlib), Data Manipulation
- **Cloud Technologies:** Basic understanding of Cloud Computing concepts

Education:

Master of Computer Applications (MCA) – *In Progress*

Career Point University, Kota, Rajasthan

2025 – Present

Bachelor of Computer Applications (BCA)

Poornima University, Jaipur, Rajasthan

2022 – 2025

- **GPA:** 7.5/10

12th Grade (Agriculture Stream)

Completed with **89%**

10th Grade (Agriculture Stream)

Completed with **59.50%**

Certifications:

- **Entrepreneurship and IP Strategy**, NPTEL ([VIEW](#))
- **Fundamentals of AI**, NPTEL([VIEW](#))
- **Introduction to IoT**, NPTEL([VIEW](#))
